

Solutions for Oncology

Lynx Mobile®

Freeing Practices to Enhance the Delivery of Care.

“Now with the new enhanced system ordering from the queue, we’ve been able to lower our inventory on the shelf by about \$400,000.”

- Lynn Sawyer
Hematology & Oncology Consultants

Lynx Mobile is the **leading customizable, web-based inventory management system for community oncology practices**, designed to help your practice:

Optimize Inventory and Increase Cash Flow

Make centralized inventory and purchasing decisions based on your inventory levels and forecasted treatment demand.

Capture All Treatment Charges and Drug Waste

Track all infusion suite activity and facilitate patient treatments without disrupting your practice workflow.

Reduce Duplicate Data Entry and Maximize Practice Efficiencies

Save time with information synched automatically to patient care systems throughout your practice.

Drive Revenue and Improve Profitability

Access key business analytics through a powerful suite of customizable real time, web-based reports.

Meet Your Unique Needs

Benefit from multiple storage configurations, adaptable to your space constraints and onsite support and training is customized for each member of your practice. Multi-site and central mix solutions are also available.
